

Appl. No. 09/807,457
Amdt. dated November 29, 2005
Reply to Office Action of September 26, 2005

Amendments to the Specification:

Please replace the paragraph beginning on page 6, line 30, and continuing to page 7, line 4, with the following rewritten paragraph:

For certain applications where sufficient air permeability of the PU preforms or definitely cured moulded PU bodies must be secured, for instance in replacements for plaster casts or other dressings, the PU material is produced in an air-permeable form, with processes for air-permeable foaming or subsequent ~~performation~~ perforation of the PU preforms being preferred. Methods for the production of foamed plastics, for instance by the addition of foaming agents or by expansion under decompression, as well as methods for a mechanical perforation of plastics are a known state of the art.
